<u>Explanation</u>

The reason why I don't have an interim report 2 is because I found a project late and I didn't make any progress at all. The only time I made any progress was after a week or 2 when the quarantine happened. This was because I couldn't find any code I could use that actually worked for the project. It took a while to find a decent one and I had to switch to a different way of running my code. I started using google colab, but that wasn't the right way until I found Jupyter notebook which works better.
